1. Introduction

The existing Shiva Textiles website currently offers only basic business information, such as product categories and contact details. To enhance user experience and increase interactivity, several improvements are proposed, including the implementation of product search functionality, filters based on price and fabric material, and an improved visual design by removing unnecessary background elements. In addition, informational sections such as About Us and detailed Branch Locations will be integrated into the Contact Us page to provide comprehensive business information. These enhancements aim to make the website more user-friendly, informative, and aligned with modern retail website standards, while also incorporating user login and account creation for personalized access, along with secure online payment and checkout functionality to enable direct product purchases through the website.

2. Purpose

The purpose of the Shiva Textiles Website Enhancement project is to transform the existing website into a more functional and user-friendly platform by introducing features such as product search, filtering, user login, and online payment. This enhancement aims to improve customer experience, support basic online ordering, and provide clear business information like About Us and branch locations. The project helps increase customer engagement, strengthen digital presence, and align the website with modern retail website standards.

3. Scope of the Project

3.1 In-Scope

The following features are included within the scope of this project:

- Adding a search functionality to find products easily
- Implementing filter options based on cost and cloth material
- Removing or improving background design for better UI clarity
- Adding an About Us section within the Contact Us page
- Displaying all branch locations where Shiva Textiles shops are present
- Improving overall user experience and website navigation
- Online payment & checkout functionality
- User login & account creation

3.2 Out-of-Scope

The following items are not included in the current scope of the project:

- Mobile application development
- Third-party marketplace integration (Amazon, Flipkart, etc.)
- AI-based recommendations or personalization
- Order tracking or delivery management

4. Roles & Responsibilities

Role	Responsibility
Business Owner	Provides overall business vision, approves final deliverables
Product Owner	Prioritizes requirements, validates features against business needs
Business Analyst (BA)	Converts BRD to FRD, gathers requirements, clarifies scope
UI/UX Designer	Designs clean UI, removes unnecessary background elements
Frontend Developer	Implements UI, search, filter, and display functionalities
Tester / QA	Performs functional, UAT(User Acceptance Testing), performance, and regression testing
End User	Uses the website for browsing and information

5. Assumptions

Assumption ID	Assumption Description
A-01	Product details such as price, material, and availability will be accurate and provided by the business team
A-02	Users will have access to a stable internet connection and supported browsers

A-03	Users will register with valid email IDs and follow password guidelines
A-04	Payment gateway credentials and approvals will be available before integration
A-05	Third-party payment services will function as per their service agreements
A-06	Stakeholders will provide timely feedback and approvals
A-07	Existing website infrastructure can support new features

6. Constraints

6.1 Cost Constraints

Constraint ID	Description
C-01	The project must be completed within the approved total budget
C-02	No additional funding will be allocated beyond the agreed budget

6.2 Time Constraints

Constraint ID	Description
T-01	The total project duration is limited to 12 weeks
T-02	Delays in approvals may impact delivery timelines

6.3 Technical Constraints

Constraint ID	Description

TC-01	Enhancements must work within the existing website architecture
TC-02	Approved technology stack must be used
TC-03	Integration is limited to selected payment gateway only
TC-04	System must support major browsers (Chrome, Edge, Firefox)

6.4 Compliance Constraints

Constraint ID	Description
CC-01	Online payment processing must comply with PCI-DSS standards
CC-02	User data must be handled as per applicable data protection guidelines
CC-03	Website must follow academic and institutional project guidelines

6.5 Operational Constraints

Constraint ID	Description
OC-01	System maintenance must be performed during non-business hours
OC-02	Content updates require business owner approval
OC-03	Limited availability of development and testing resources

6.6 Security Constraints

Constraint ID	Description
SC-01	User passwords must be stored in encrypted format

SC-02	Secure protocols must be used for login and payment transactions
SC-03	Unauthorized access to user data must be prevented
SC-04	Input validation must be enforced to avoid security vulnerabilities

7. Functional Requirements

Req ID	Feature Name	Description
FR-01	Website Navigation	System shall provide clear navigation menus
FR-02	Product Search	System shall allow users to search products
FR-03	Filter by Price	System shall filter products by price range
FR-04	Filter by Material	System shall filter products by cloth material
FR-05	User Registration	System shall allow new users to create an account
FR-06	User Login	System shall authenticate users using email and password
FR-07	User Logout	System shall allow users to securely log out
FR-08	Online Payment	System shall allow users to pay using online payment methods
FR-09	Order Placement	System shall allow users to place orders after payment

FR-10	Payment Confirmation	System shall display payment success or failure message
FR-11	About Us Section	System shall display company information
FR-12	Branch Locations	System shall display branch details

8. Non-Functional Requirements

NFR Type	Description
Performance	Login and payment responses within acceptable time
Security	Password encryption and secure payment handling
Availability	System available 24/7
Reliability	Payments should not fail under normal conditions
Scalability	Should support increase in users and transactions
Compliance	Must follow PCI-DSS standards
Testing	RTM, UAT, security testing mandatory
Load & Stress	System should handle concurrent users during payments

9. Business Rules

Rule ID	Business Rule Description
BR_05	User must be logged in to place an order
BR_06	Payment must be completed successfully before order confirmation

BR_07	Login credentials must be validated before access
BR_08	Password must follow minimum security standards
BR_09	Payment failures must show clear error messages

10. Approvals & Sign-Off

Name	Role	Approved (Yes/No)	Date
Shiva Kumar	Business Owner	Pending	–
–	Product Owner	Pending	–
–	Business Analyst	Pending	28-01-2026
–	IT Lead	Pending	–
